Product Data Sheet

Automatic Transmission DM Fluid

Description

CountryMark's Advantage™ Automatic Transmission DM Fluid is a multi-purpose product for use in GM and FORD automatic transmissions. It is formulated to meet the viscometrics, friction, wear, and oxidation stability properties required in passenger car and light truck transmissions.

Features and Benefits

Manufacturer Requirements: Meets pre-2006 GM and FORD vehicle automatic transmission fluid requirements. It also meets the ALLISON C-4 requirements. It is not recommended for use in applications calling for Dexron VI, Mercon V, SP and Type F.

High Temperature Performance: Provides excellent oxidation and sludge protection.

Smooth Shifting: Due to its enhanced friction properties, this fluid provides smooth shifting performance throughout the service interval.

Applications

CountryMark Advantage Automatic Transmission DM Fluid is formulated to meet or exceed a variety of specifications and requirements by engine manufacturers, including:

- ALLISON: C-3 & C-4
- GM DEXRON III/II (OBSOLETE)
- FORD MERCON (OBSOLETE)
- CATERPILLAR TO-2
- VOITH G607
- VOLVO S6/66 MANUAL TRANSMISSION

Typical Properties

	TEST	Advantage D/M
Viscosity @100°C	D445	7.1
Viscosity Index	D2770	191
Pour Point °C	D97	-40
Color	Visual	Red

Safety and Health

Caution! Customers are advised to check the oil recommendations for their equipment. Equipment manufacturers recommend specific viscosity grades of oil for certain ambient temperature ranges. Use of oil outside its recommended temperature range can cause lubrication-related problems and lead to permanent engine damage.
